- Architect for a pilot Grocery iOS application that has been used to win clients internationally. There is a professional video of the app in the store produced.

**Development Lead** **Saggezza** **Sept. 2014 - Feb 2016**

- Tasked with creating mobile, web and enterprise-level apps.
- Lead teams as large as 12 people to execute on portfolio projects.
- Implemented AngularJS admin suite and UI layer for an Android app used by Outerwall's (Red-Box, CoinStar, etc..) 750+ Nationwide technicians and logistics experts.
- Worked with EmberJS and EmberData to create a full-stack application for end-customers like JetBlue Airlines. Player-Coach for a strong Agile team of AngularJS developers on a very large project, completing a proprietary application for a large client in NY.

**Applications Developer** **AT&T** **June 2008 - July 2014**

**Lead Polyglot Developer - UX + MVC - Ruby on Rails Web Apps** (May 2011 - July 2014)

- Tasked with creating multi-screen, data-intensive dashboards for executives using Ruby on Rails.
- Created many Ruby on Rails-driven, full-featured web applications.
- Created immersive front-end UX's via js, css3, html5 and back-end solutions driven by RoR.
- Designed RoR front-end views, screen-by-screen application flows, and MVC logic.
- Provide company-wide trainings for the executive "Mobile-first" program, teaching RoR.
- I gave monthly trainings in RoR, CSS, and angularJS - high positive feedback in these sessions.
- Project Team's SME in these technologies: git, ruby, rails, css3, postgresql, js, angular, Node

**Developer - Web Apps** (February 2011 - May 2011)

- Needed to depict data to thousands of end users.
- Created four Ruby on Rails web applications to be used as part of an embedded system.
- Created several JBOSS web applications, writing Java servlets and JSP's to host reports and other CRUD actions.
- Lead a team of on and off-shore contractors to clear up inconsistencies up/down stream with data and logic using Perl/Ksh mostly.

**Developer - Prod. Support** (December 2010 – Feb 2011)

- Needed to clear up sporadic issues in the wholesale ordering system.
- Developed bash scripts with SQL to ping the right sources and collate troubled circuits.

- Report back to the users with instructions to eliminate future instances by 95%.
- Many similar scenarios and responses lead to my 2nd Key Contributor Award in a row, placing in the 25th percentile in 2012 and 2013.

**Developer - Coldfusion** *(September 2009 – December 2010)*

- The CEO had a yearly set of goals: “ #7. We need to track the network in one tool.”
- Completed requirements for the most complex modules.
- Coded several front-end and back-end interfaces and modules using ColdFusion, SQL and SSIS.
- Helped teammates finish theirs.
- Tracking tool was built, productivity in the Networking, Planning and Engineering team skyrocketed.

**Program Manager** *(June 2008 – October 2009)*

- There were 8 programs with no leadership, they were to help in delivering U-verse.
- Took control of all coordination activities cross-team, internally and nationally.
- Audit compliance of 100% and contributions to the U-verse core product successfully delivered.

<b>Test Engineer</b>	<b>WMS Gaming</b>	<b>March 2008 - June 2008</b>
----------------------	-------------------	-------------------------------

- Tasked with: “Completing all required tests on the Dean Martin slot machine game.”
- Used linux extensively to manipulate game data and execute tests.
- Used bash scripts to automate regression tests.
- Completed this project in less time than slated, given teammates work to assist with.

<b>Teacher/Web Developer</b>	<b>St. Gabriel’s Catholic Parish</b>	<b>Sept. 2007 - March 2008</b>
------------------------------	--------------------------------------	--------------------------------

- Tasked with: “Complete website redesign and teach the K-8 children”.
- Redesigned and implemented new website.
- Fixed the hardware installations of cat-5 cable to allow network to reach all classrooms.
- Developed teaching curriculum for all children coming to “Computer Class”.

<b>Test Engineer</b>	<b>Emerson Appliance Controls</b>	<b>March 2006 - August 2006</b>
----------------------	-----------------------------------	---------------------------------

- Started with limited structure in place to test high-end model kitchen stoves.
- Designed tests in C++, including interactions with a voltmeter and oscilloscope.
- Programmed a tool to communicate with an EEPROM on a power board.
- Designed automated tests, converting from a manual process henceforth.
- Trained co-workers to use test suite, achieving a 90% reduction in testing time.

<b>Web Developer</b>	<b>Chicago Board of Trade</b>	<b>June 2003 - Dec. 2005</b>
----------------------	-------------------------------	------------------------------

Direct Trading, LLC.

- Programmed and launched two sites: DirectTrading and DirectForex.
- Assembled and managed a normalized MySQL DB.
- Conducted hardware and software troubleshooting for my company and floor affiliates.
